NEST YOUR LABELS TO GET SUPER-SPECIFIC

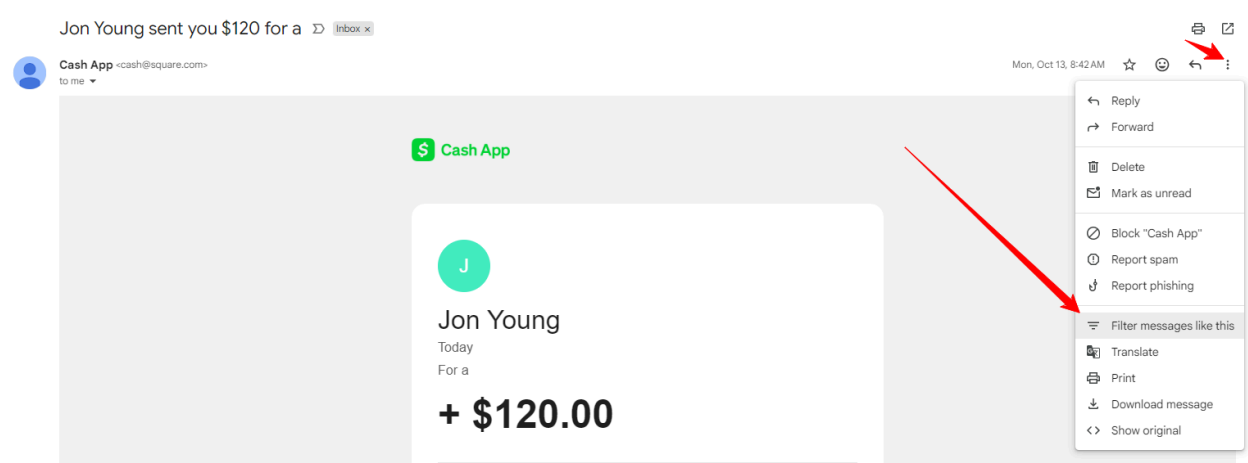

Think of your sub-labels as data slices when you go to export your email from Google Takeout

Once you've setup your labels, you can apply them to tons of emails using Filters like email automation rules

As you can see, I have tons of different tags nested under my main Accounts label

To download all of them would make the file too large, and I would end up with tons of shit I didn't actually want

But this way, I can just download emails that have been labeled as received payments from affiliates on different platforms I use
